Customer Satisfaction – Scrapeout – 10/10

Very knowledgeable and professional team. Great customer orientation. Thinking with the head of the client - great help in prioritization and action planning. Project has been carried out as it had been planned - timing, budget and deliverables.

Customer Satisfaction – GLU Global – 9/10

It was clear the Silicon Overdrive team had a deep understanding of AWS Cloud services and optimal approach to architecting the environment. Where a company is on a Startup path, or several years into utilizing AWS, I could see the review process would still provide benefits.

Silicon Overdrive team worked in a professional manner with clear understanding of tasks needing to be complete to provide optimal architecture.

Customer Satisfaction – Saturated – 10/10

I would definitely highly recommend the Overdrive team because they are always on the ball with everything. They guided us each step of the way and have supported us throughout our AWS journey. They encouraged us to adopt various business principles that we had never considered before. We were even able to refine a lot of processes and ensure that they are well documented.

We adopted cloud techniques that have made a huge impact on our business and how we should best adopt and utilise them within the business. The Overdrive team continues to wow me with their excellence and team dynamic...
